Primary Examiner — Sunit Pandya

(57) **ABSTRACT**

A method and apparatus for implementing a Casino Craps game with additional side bets. The “Point-STAY”, “Seven-STAY”, “SOSI” (Seven-Out-any-Seven-wIn) and “SOX” (Seven-Out-eXact-seven-win) bets are multiple stage bets, initiated after the point is established. First stage: the Point-STAY bet wins on the point, or loses on a seven-out; and the Seven-STAY bet wins on a seven-out, or loses on the point. Second stage: both bets win on a new point matching the previous point or lose on a new point differing from the previous point. First stage: the SOSI and the SOX bets win on a seven-out, or lose on the point. Additional stages: the SOSI wins on each additional seven, maximum of four wins, or loses on a point being established; and the SOX bet wins on each additional seven with the two dice combination matching the previous seven-out combination, maximum of two wins, or loses on a point being established.
